## Program 10

```
Implement Alpha-Beta Pruning.
Code:
import math
def minimax(node, depth, is maximizing):
  ,,,,,,
  Implement the Minimax algorithm to solve the decision tree.
  Parameters:
  node (dict): The current node in the decision tree, with the following structure:
       'value': int,
       'left': dict or None,
       'right': dict or None
  depth (int): The current depth in the decision tree.
  is maximizing (bool): Flag to indicate whether the current player is the maximizing player.
  Returns:
  int: The utility value of the current node.
  # Base case: Leaf node
  if node['left'] is None and node['right'] is None:
     return node['value']
  # Recursive case
  if is maximizing:
     best value = -math.inf
    if node['left']:
       best value = max(best value, minimax(node['left'], depth + 1, False))
```

```
if node['right']:
       best_value = max(best_value, minimax(node['right'], depth + 1, False))
     return best value
  else:
     best_value = math.inf
     if node['left']:
       best value = min(best value, minimax(node['left'], depth + 1, True))
     if node['right']:
       best_value = min(best_value, minimax(node['right'], depth + 1, True))
     return best value
# Example usage
decision_tree = {
  'value': 5,
  'left': {
     'value': 6,
    'left': {
       'value': 7,
       'left': {
          'value': 4,
          'left': None,
          'right': None
       },
       'right': {
          'value': 5,
          'left': None,
          'right': None
       }
     },
     'right': {
```

```
'value': 3,
     'left': {
        'value': 6,
        'left': None,
        'right': None
     },
     'right': {
        'value': 9,
        'left': None,
        'right': None
},
'right': {
  'value': 8,
  'left': {
     'value': 7,
     'left': {
        'value': 6,
        'left': None,
        'right': None
     },
     'right': {
        'value': 9,
        'left': None,
        'right': None
     }
   },
  'right': {
     'value': 8,
```

The best value for the maximizing player is: 6
